

Kamari has made significant progress toward all her learning plan goals. She has overcome her fear of walking without a lot of support. Kamari has also learned to adjust to unexpected changes in her daily routines and has become far more independent in many activities of daily living. Kamari loves all types of music and especially enjoys taking piano lessons and practicing on her piano at home every day. She is learning to read and type in Braille and has already mastered eleven letters! Kamari always looks forward to her regular sessions at the TEAMability Learning Center.
